1:15 pm   Water Park Activities

2:15 pm   Rec. Sports & Games

3:00 pm   Afternoon Session

3:45 pm   Daily Review

4:00 pm   Departure

Future Stars Lego Stop Motion Animation Camp can make your LEGO adventure come to life! Campers will create a short film using favorite action figures or LEGO characters. Whether its recreating a scene from Star Wars or designing a world of their own, campers will bring their visions to the screen. Campers will create storyboards, build characters, develop backdrops and use webcams to produce their short movies. At the end of the session campers can take home a USB drive with their projects to show off to family and friends!

Programs will take place in collegiate classrooms and/or computer labs with all necessary equipment provided. Additional recreational games and Water Park Activities supplement the daily curriculum to give campers a balanced day of learning and fun.

computer coding · web programming · mobile app development · robotics programming · software development
interactive learning · math & science · technology skills · problem solving · creativity · critical thinking · spatial skills
